5G-6G Friend or Foe?

The real story behind the push for dangerous new technologies

FRIEND

or

FOE?

“The single most important fact about 5G that nobody is talking about is called “phased array.” It will totally change the way cell towers and cell phones are constructed and will transform the blanket of radiation which has enveloped our world for two decades into a million powerful beams whizzing by us at all times.”

– Arthur Firstenberg, [5G - From Blankets to Bullets](#)

- 1. 5G Technology is a Globalist, Technocratic Initiative 5
- 2. The United Nations, Agenda 2030 and 5G 6
- 3. Why You Should Know About the International Telecommunication Union 7
- 4. The ITU World Radiocommunication Conference Establishes the Agenda for Global Surveillance 10
- 5. 5G is Essential for Achieving the UN’s Agenda 2030 Sustainable Development Goals 11
- 6. CODES, the Global Alliance Paving the Way For Digital Sustainability Enslavement 12
- 7. The World Economic Forum is Also a Major 5G Player 15
- 8. 5G is Critical to the Fourth Industrial Revolution (4IR) 17
- 9. The COVID-19 “Pandemic” Paved the Way for 5G and SDG Advancement 20
- 10. Central Banks Need 5G to Power the Shift to a Digital Economy 23
- 11. 5G Tech is Paramount to the Military-Industrial Complex 26
- 12. U.S. Legislation Pushing 5G Forward 29
- 13. Examining Industry’s Big Plans for 5G 31
- 14. 6G Development is Crucial for the United Nations’ Sustainable Future 35
- 15. The Public Has Been Actively Misled About the Safety of 5G 39
- 16. 5G is a Dangerous Technology that Threatens Human Life 43
- 17. 5G is a Menace to Nature and the Environment 51
- 18. How to Protect Against 5G and EMF Exposure 52
- 19. Additional Resources 53

“

5G and 6G technology will eventually saturate the planet enabling a new era of instant connectivity to power smart cities, Internet of Things (IoT) devices, and autonomous vehicles to name a few.

This exposé reveals the forces pushing for this unprecedented level of interconnectedness, answers why they are so eager to achieve it, and divulges the potential harm it poses to individuals and the environment.

If you have ever wondered why the world is being pushed so rapidly to implement 5G technology, you will find many of the answers here.

”

1

5G Technology is a Globalist, Technocratic Initiative

globalist

one who places the interests of the entire world above those of individual nations.

technocrat

a technological expert, especially one concerned with management or administration.

technocracy

1) a theory and movement, prominent about 1932, advocating control of industrial resources, reform of financial institutions, and reorganization of the social system, based on the findings of technologists and engineers.
2) a system of government in which this theory is applied.

technocratic

of, relating to, or designating a technocrat or technocracy.

5G is not just a novel technology designed to help the average Joe download high-definition movies faster or play the latest mobile video games with extremely low latency. Though it will achieve these aims, it is designed for purposes much greater and far more malevolent.

After extensive research (all compiled here for your review), it can be concluded that the United Nations (UN) and its Agenda 21/Agenda 2030 Sustainable Development plans along with the central banking establishment are the primary forces behind the push for 5G. For a quick primer on why this is a bad thing, read "[Decoding the UN Sustainable Development Goals.](#)"

This does not mean they are the only players with vested interests as telecommunications companies, governments, and businesses of all types stand to benefit from the technology.

However, for the purpose of completely reshaping the world into a never seen before global technocracy, the UN and the central banking cabal sit atop the pinnacle of the 5G pyramid.

The plan to connect the world through technology was conceived at least a century ago and is explored in many works of fiction such as Aldous Huxley's *Brave New World* and Phillip K. Dick's *The Minority Report*, as well as non-fiction works such as Zbigniew Brzezinski's *Between Two Ages: America's Role in the Technetronic Era*.

The writers of previous eras could only imagine the technology required to erect a society with global surveillance as a central feature, controlling every aspect of life. Today we are on the fast track to realizing what Huxley, Dick, and Brzezinski could only imagine.

2

The United Nations, Agenda 2030 and 5G

The digital revolution is here whether welcomed or not and the United Nations is at the forefront of global transformation through [Agenda 2030](#) and the [Sustainable Development Goals](#) (SDG).

The plan to increase global digital interconnectivity was kickstarted during the [World Summit on the Information Society \(WSIS\)](#). This UN-sponsored, two-phased summit on “*information, communication and, in broad terms, the information society took place in 2003 in Geneva and in 2005 in Tunis.*”

The WSIS will convene again [in May 2024](#) in Geneva, Switzerland to commemorate its 20th anniversary and push the world further along the path towards global digital inclusivity. Or, in plain words, a global surveillance state.

The WSIS includes public and private sector members from across the globe. There are over 25 distinct branches of the UN leading the charge for global connectivity, but perhaps the most essential is the International Telecommunication Union (ITU).

UN Organizations partnered with the World Summit on the Information Society (WSIS)
